PROECO SRL QUALITY, HEALTH, SAFETY AND ENVIRONMENT POLICY

PROECO Srl provides multidisciplinary engineering services related to Oil & Gas, Petrochemical, Energy and Environment fields and manages its activities with the aim to provide continuous improvements of Customer satisfaction, Environment and Health & Safety standards.

We are committed to ensuring:

COMPLIANCE

with Contract obligations, legislations, applicable standards and codes, guidelines issued by international organizations. We believe that prompt reaction to regulation's changes represents a competitive advantage.

PREVENTION

of stakeholders' Health & Safety and Environment protection, taking into account the risks associated with the specific task with a cause and effect integrated analysis.

RISKS AND OPPORTUNITIES MANAGEMENT

through a *risk-based thinking* approach, monitoring and controlling processes' associated risks, identifying improvement opportunities; we promote at any level risks management awareness empowering the stakeholder and recognizing their safety behaviors.

HUMAN RESOURCES VALUE ADDED

through constant improvement of technical and management skills delivering employees regular training program. Stakeholder are encouraged to rise awareness of their own safety, colleagues and to protect the work environment.

RESEARCH & DEVELOPMENT

strengthening and improving the commercial relations and footprint, promote new partnerships and defining shared goals in terms of Health & Safety, Environment protection, Transparency and Accountability of the services provided.

INNOVATION

providing our client with the necessary resources to adopt the best available engineering solution in term of technology (BAT), process, products and services aiming to minimize the environmental footprint and stakeholders' Health & Safety risks

ADAPTABILITY & FLEXIBILITY

of our organization customized for the scope of work to interact and create synergies with our clients and suppliers to implement common goals and achieve projects successes.
